Small electric fresh chestnut dethorning and depilatory machine

Description:

The multifunctional chestnut shelling machine is small in size, highly efficient and easy to operate. It will not damage the inner skin of the chestnut. The fruit skin after shelling is smooth and scratch-free, which solves the problem of automatic sorting of fruit and shell.

Features:

1. High efficiency, can process 1000-1500kg chestnuts per hour.
2. The main roller is equipped with a polytetrafluoroethylene hose. No damage to the chestnuts, the peeled chestnuts do not change color, no scratches, and have a beautiful luster
3. Good wind selection, reasonable design of vibration screen and fan. Clean screening, avoiding the trouble of secondary screening
4. Good workmanship, uniform use of paint panels. The machine is beautiful and atmospheric.
5. With only a few changes and adjustments to the machine, it can be used to shell corn, pine nuts, corn and other crops. The chestnut shelling machine solves the problem of heavy labor intensity and low production efficiency when harvesting chestnuts.

Quality, price, time and service is the tenet of our business.

Credit, reposal, negotiation and cooperation is our standard.

Working principle

This machine uses the working principle of roller, teeth, rotor and roller flow. The rotor drives the spiral rolling teeth to force the fruit and the peel to squeeze and separate each other in the roller. The fruit and the peel are separated by wind selection.
